

Brian Edmiston, MSPT Physical Therapy

Brian chose to study physical therapy because of his interest in athletic performance. “I find it very rewarding to assist patients in overcoming their physical impairments to maximize performance,” he remarks. With decades of experience, Brian embraces a holistic approach that’s tailored to each individual. “You may come in with a sore shoulder, but I’ll look at how your entire body’s biomechanics might be affecting that shoulder.”

MEDICAL EDUCATION

Master of Science in Physical Therapy: Regis University, Denver, CO

SPECIALTIES
